

Achievement of 100% Admissions

Admissions are also increasing every year in our college. Priority is being given to making 100% admissions with good planning for this. Part of that is that we were able to make 100% admissions even in the year 2020-21. In order to make 100% admissions, our faculty visited all the junior colleges in Rayadurg town and other zonal colleges at the zonal level, explained the specialties of the college and explained to the students what kind of employment and job opportunities are available in any course, any group, informing the college students about the facilities available to them to attract the Intermediate students, explaining the fact that the college is located in a pleasant environment in the lap of beautiful nature. Also, programs were carried out by the students of the college to spread the word about the college. College faculty went to junior colleges to raise awareness on how to apply for degree Colleges through online thereby informing the modern teaching facilities available in the college and the benefits of studying in the college. We were able to achieve one hundred percent admissions by undertaking similar programs.
